

NEW GELATO-ON-A-STICK ACCESSORIES FOR TONDA.

Not anymore a fashion for few, Gelato sticks are a common element inside gelato shops. Artisan made bars and icicles with different shapes and colors have a relevant place inside the display cases and represent an important source of income for gelato makers. For traditional display cases, IFI has already made an accessory that can contain any kind of gelato on a stick (see *IFI NEWS Oct/Nov 2009*), that is a grid in folded and welded stainless steel.

IFI IS NOW PRESENTING THE GELATO-ON-A-STICK ACCESSORIES WHICH ARE EXPRESSLY DESIGNED FOR TONDA DISPLAY CASE, IN ORDER TO CONTAIN ICICLES, CHOCOLATE-COATED BARS AND CAKE-COATED BARS.

The piece is a monobloc in white plexiglas - 8 mm thick - with holes for the sticks. Its shape is trapezoidal and it has transparent plexiglas feet, diam. 18 mm and h 110 mm, perfectly suitable to the pan. Thanks to this accessory the sticks are at the highest level possible, same as the pan, thus compelling impulse buying and giving back an image of cleanliness and continuity among the pans.

In the middle of the display case you can put chromed or neutral flavor markers or, only in the version with on board compressor, an optional element for single-portions (a stainless steel tray plus an eventual plexiglas folded with holes for the single-portions).

The gelato-on-a-stick accessories must be used inside the standard trapezoidal 5 lt pan. Inside TONDA you can fit both gelato pans and pans with gelato-on-a-stick accessories: for maximum versatility and adaptability to any situation.

The gelato-on-a-stick accessories are available with different holes according to the type of stick (icicles, chocolate-coated bars and cake-coated bars) and the type of machine used for sticks production.

You can find the prices of gelato-on-a-stick accessories for Tonda inside the IFI's reserved area: www.ifi.it/extranet
